

2001 Christmas Tree Cutting Fact Sheet

Gifford Pinchot National Forest

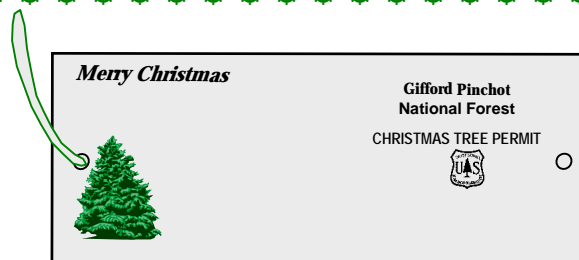

Beginning Monday, November 19, 2001, you can bundle up, get your permit and head into the National Forest for a Christmas tree. Sorry, no refunds. A permit does not guarantee you will find a suitable Christmas Tree.

Tree Cutting Instructions.

- ✿ Cut one tree per permit.
- ✿ Select trees not more than 12 feet tall. Tree topping is prohibited.
- ✿ Cut the tree 12 inches or less above the ground level. Remove snow around tree base if needed. Cut off live limbs remaining on the stump.
- ✿ To make your trip back to the car easier, slide your tree on a plastic tarp.
- ✿ Upon return to your vehicle, punch out month, day, and year on permit. Immediately attach securely to your freshly cut tree where it will be clearly visible.

The Forest will continue an open cutting policy. Maps display areas not available to cutting.

Special Instructions

- ✿ Christmas tree permits are not refundable for any reason.
- ✿ Tree cutting is prohibited in Wildernesses, the Mount St. Helens National Volcanic Monument, developed campgrounds, administrative sites, within 300 feet of streams, on private or state owned lands within national forest boundaries, and in any other posted area.
- ✿ Gifford Pinchot National Forest Christmas tree permits are not valid on other land ownerships. Cutting on private lands is subject to trespass action.
- ✿ If unsure about areas available for tree cutting, contact the nearest Ranger District office or a Forest Service Officer in the field. Sno-Park permits are required when parking in a designated Sno-Park area and NW Forest Passes required at designated trailheads.

Safety Tips

*Be Prepared For
Winter Weather Conditions!*

- ✿ Arrive early at your cutting area, otherwise you have to drive home in the dark.
- ✿ Carry tire chains, shovel, flashlights, and blanket in your vehicle. Most National Forest roads are not maintained or snow plowed during the winter.
- ✿ Wear proper winter clothing and carry extras in case you get wet.
- ✿ Drive safely and slowly, turn on your lights, and watch for ice.
- ✿ Let someone know where you are going and when to expect you back.
- ✿ Steep terrain and deep snow make walking difficult.
- ✿ Your ax or saw are sharp, Be careful.
- ✿ Park your vehicle on road shoulder or in turnouts. DO NOT BLOCK THE ROADWAY.

Keeping Your Tree Fresh

Make A Fresh Cut

When you get your tree home, make a fresh cut on the butt to open up the pores which have been clogged by sap. Cut off at least one-half inch. The fresh-cut surface should be creamy-white, not yellow or brown. If you do not make a fresh cut, the tree will not be able to drink water. After the cut is made, put the tree in water as soon as possible. Even if a hole is drilled to accommodate a pin-type stand, a fresh cut should also be made on the butt.

Put in Water

Place the tree in a sturdy stand which will hold at least one gallon of water per day. Fill with plain water. If the tree is not going into the house right away, it should be stored in a bucket of water on a cool porch or patio away from wind or sun.

Water Daily

An average tree may consume between a quart and a gallon of water per day. If the water level drops below the cut end of the trunk, a seal will form and no more water will be absorbed by the tree.

Mini-Lights Produce Minimum Heat

Miniature lights produce much less heat and reduce the drying effect upon the tree. Always check light sets for frayed or cracked wire insulation and broken sockets before placing them on a tree. Do not attempt to repair a worn light set. Throw it away and buy a new set. Always turn off the lights of your tree when leaving the house or retiring for the night.

Keep Away From Heat Sources

Place the tree away from heat sources such as heating vents, fireplaces, wood stoves and fireplace inserts, radiators, television sets or sunny windows.

Recycle Your Tree

After Christmas, before the tree dries, remove it from the house for your local chipping and compost program. Call your local county recycling center or disposal service for more information. Never burn any part of a Christmas tree in a wood stove or fireplace.

For more information give the Pacific Northwest Tree Association a call at (503) 364-2942 or visit their web site at <http://www.nwtrees.com>
